

Key Vaccination Resources for Healthcare Professionals

With so many vaccination training materials available, it can be difficult for providers to determine which ones best suit their needs. The key resources listed below provide a strong foundation for building and sustaining vaccination skills. They also offer tools for staying up to date and references to address specific clinical situations.

Acronym list appears at end of document

The key resources shown below are divided into several helpful categories:

- 1 **Foundational content** with which every vaccinator should be familiar,
- 2 **Supplemental content** useful after completing foundational training,
- 3 **Additional tools** to help providers grow in vaccination expertise, and
- 4 **Major organization websites** offering additional vaccination resources.
